EDUCATION

The University of Texas at Dallas
Bachelor of Science in Computer Science

December 2026
Richardson, TX

EXPERIENCE

Software Engineer Intern

May 2026 – Present

Microsoft

Redmond, WA

- Building full-stack tooling for visual embeddings in the **Excel Power BI Add-In**, pairing a **TypeScript** front-end with **C#** and **.NET** analysis services over **REST APIs**, expanding discoverability for **6M+ users**.
- Developing an **AI visual-generation feature** on a **TypeScript SDK**, grounded in metadata to produce **visual embeddings** across **connected tables in Excel**, broadening user capabilities without manual configuration.

Software Engineer Intern

June 2025 – Aug. 2025

Goldman Sachs

Dallas, TX

- Shipped a new **ingestion pipeline** for portfolio exposures that cut upload times by **80%** for **10,000+ clients**, leveraging **React interfaces** alongside **Python API microservices** supporting a downstream pricing service.
- Designed a risk-reporting feature for the **TypeScript React** and **Redux** PnL attribution dashboard by implementing data-quality validations in **Vert.X RESTful Java microservices** backed by **Elasticsearch**.

Software Engineer Intern

June 2024 – Aug. 2024

Bell Textron

Arlington, TX

- Automated **10,000+** system software requirement updates utilizing an **Azure DevOps** work item management system with a **5-stage CI/CD** deployment workflow, reducing manual data synchronization checks by **95%**.
- Orchestrated **20,000+** requirement comparisons between **DOORS** and **Azure DevOps** using **Python**, **Azure REST API**, **DXL**, and **WIQL** to synchronize requirements for **15+** embedded software teams.

PROJECTS

Aria | *React, TypeScript, Node.js, TypeScript, MCP Server, GitHub Copilot SDK*

June 2026 – July 2026

- Built a proactive agentic diabetes companion on **Microsoft Scout** that turns live CGM data into a **longitudinal patient persona**, autonomously booking appointments and drafting clinician messages across **M365**.
- Grounded trend detection and cross-condition linkage in **6,000+** in-context glucose readings using a **deterministic reasoning engine** with **7 MCP tools** and **2 agent skills**, enabling real-time clinical reasoning over CGM data.

Horizn | *Python, FastAPI, PostgreSQL, React, TypeScript, Tailwind CSS, Docker, Auth0*

Feb. 2026 – May 2026

- Unified **price forecasting**, interactive map exploration, and account features into one platform for home buyers with simulation runs backed by a **SARIMAX model service** and **containerized CI/CD deployment**.
- Delivered multi-year, ZIP-level housing forecasts within **3% MAPE** across **4 economic scenarios** for **255 ZIP codes** by building a **SARIMAX** pipeline on Zillow, FRED, and inventory data with rolling backtest validation.

LEADERSHIP

President

Jan. 2025 – Present

The Association for Computing Machinery

Richardson, TX

- Leading the largest computer science organization at UT Dallas, spanning **800+ members**, **200+ officers**, and 8 divisions, with **3 consecutive international awards** earned following my organizational initiatives.
- Directing 18 executive board members across **50+ campus events** including HackUTD, North America's **largest 24-hour hackathon**, alongside 4 semester-long programs serving **175+ participants** and 8 industry sponsors.

TECHNICAL SKILLS

Languages: Java, C++, Python, C#, TypeScript, HTML, CSS, JavaScript, C, Bash, SQL, PHP, Swift

Frameworks: React, Flask, PyTorch, Node.js, Next.js, Unity, Unreal, Tkinter, Tailwind

Databases & Cloud: PostgreSQL, Elasticsearch, Supabase, Auth0, Azure

Developer Tools: Git, Docker, Kubernetes, XCode, VS Code, Visual Studio, Figma
